

# Remotely control your presentation with Internet Clicker

A QUICK GUIDE ↓

streeem<sup>®</sup>  
For live. For virtual. For hybrid

# In this guide, we'll be showing you how you can remotely control your slides as part of your virtual event.

In order to be able to show your slides as part of your presentation, we need to have these in advance - please send them, as agreed, as soon as possible.

We prefer using Powerpoint or Keynote files, however, we can use Google slides or PDF if that's all you have!

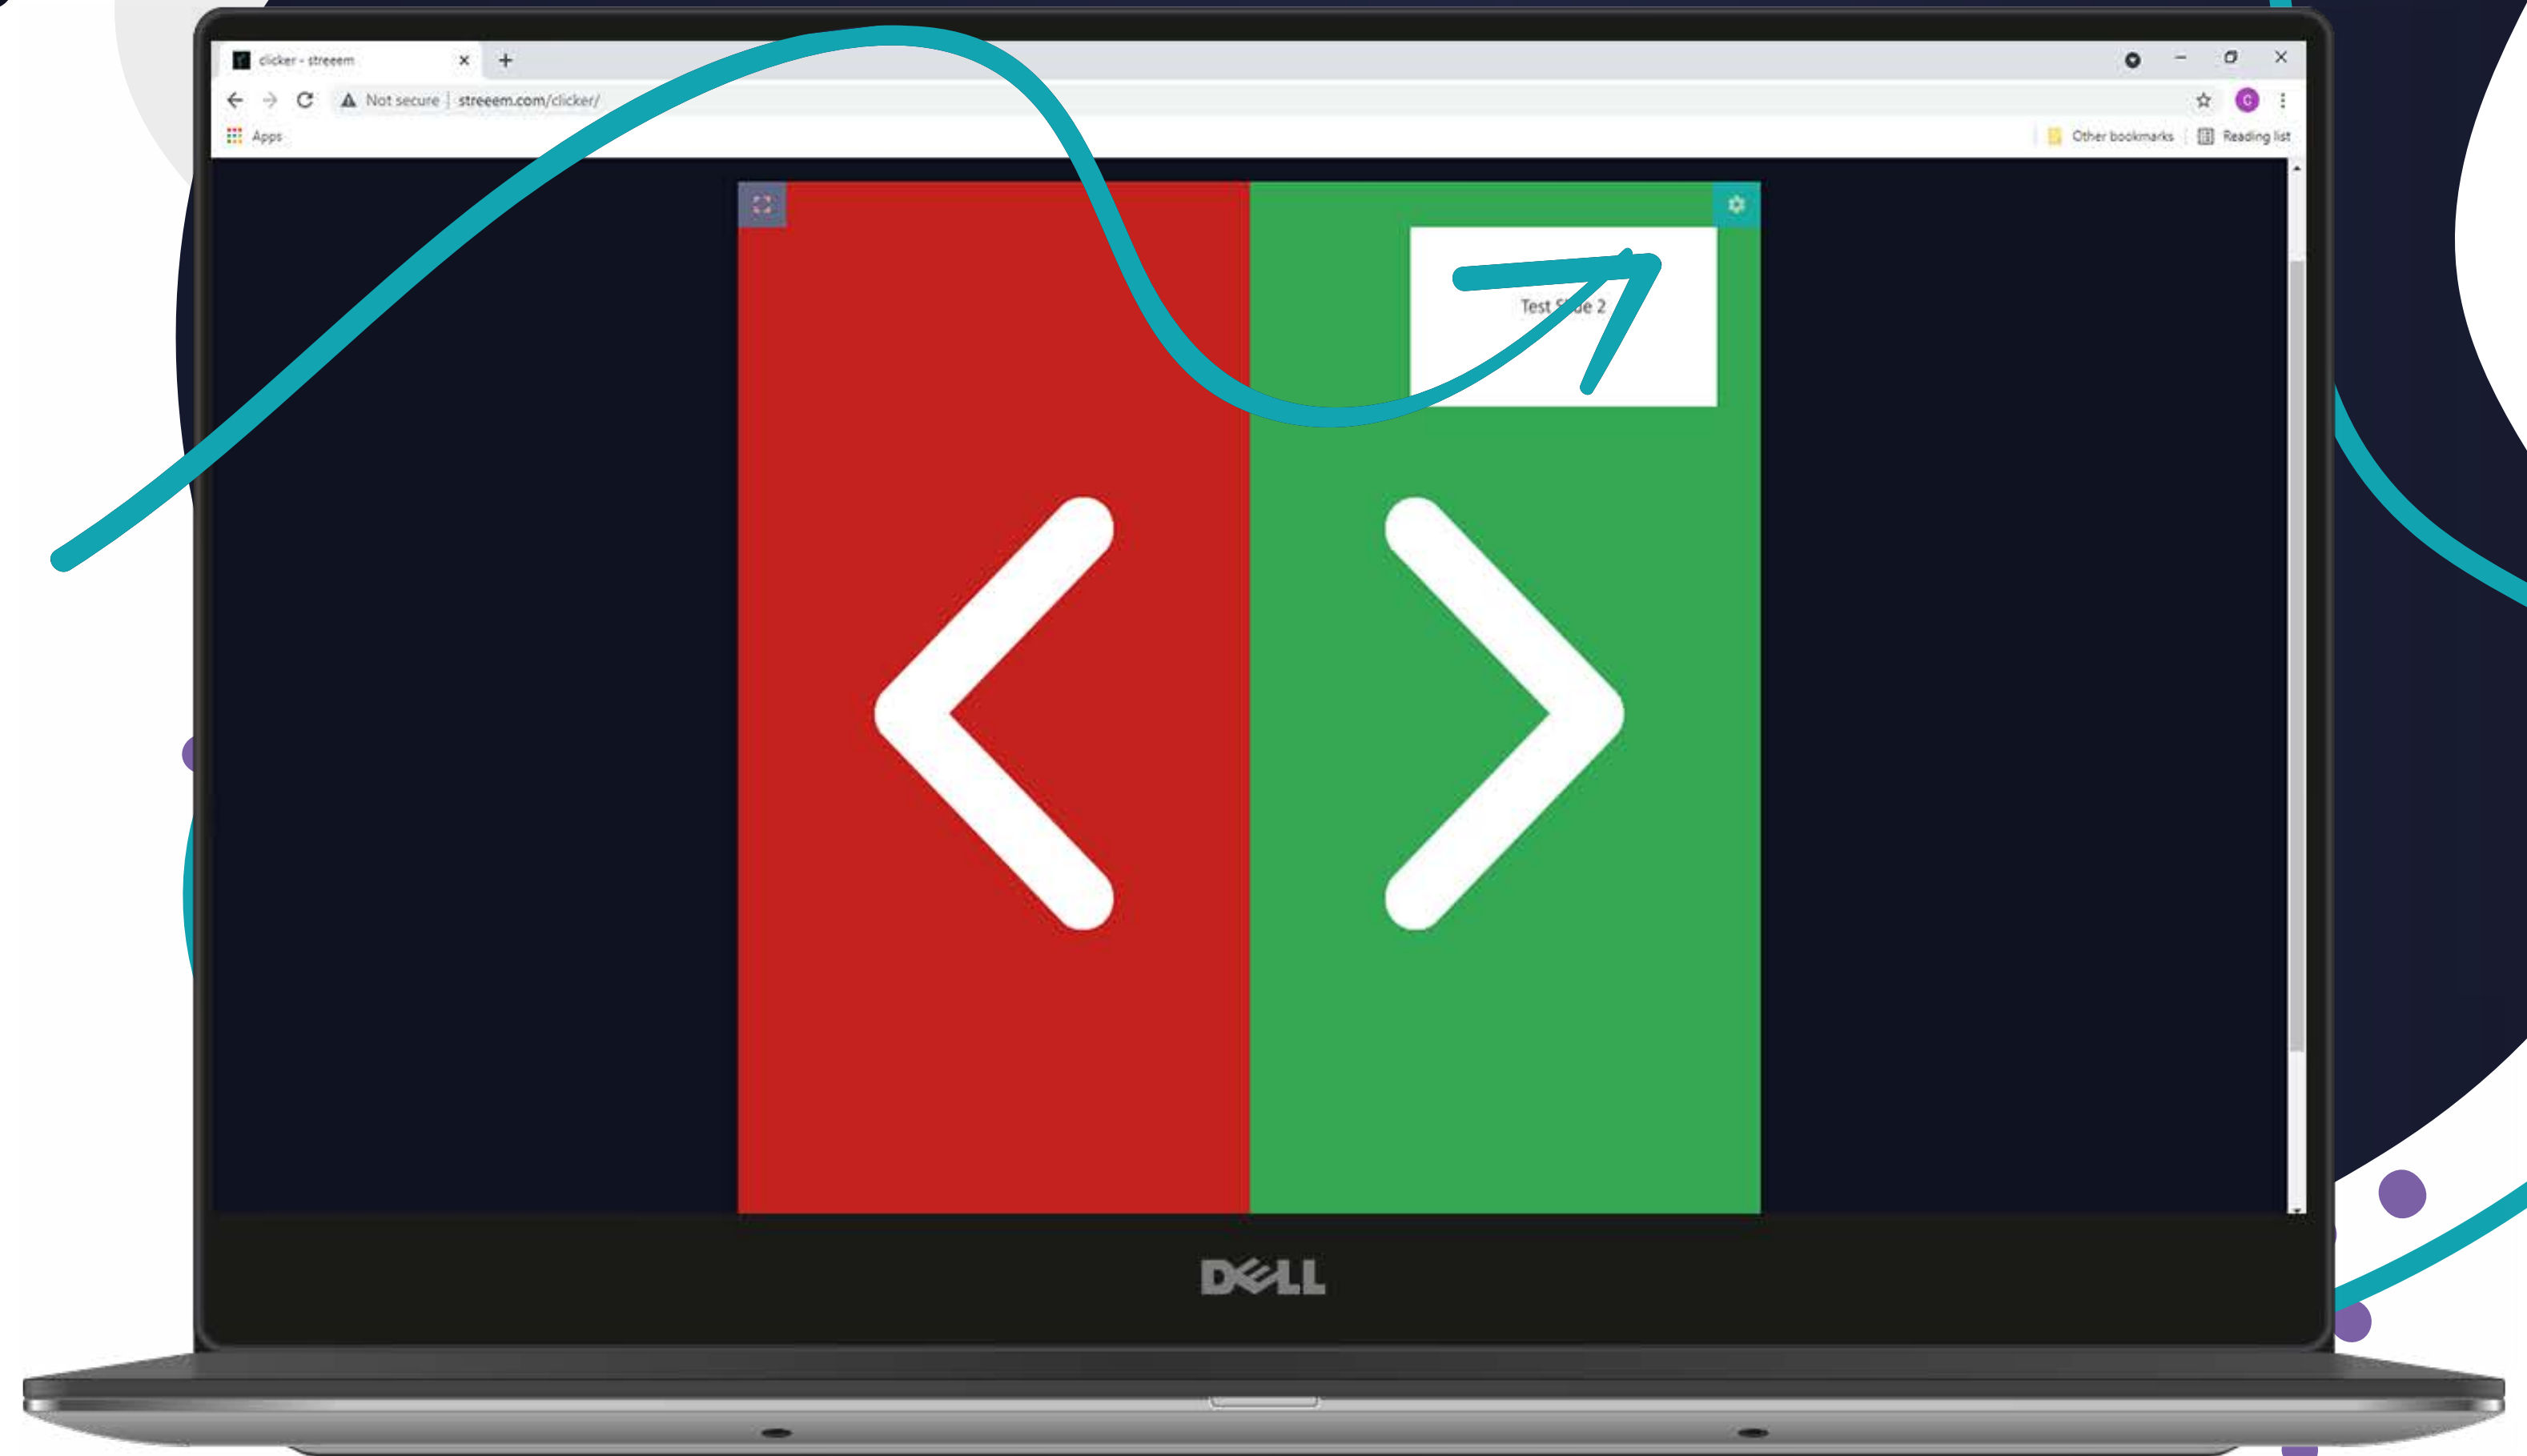

Once we have them, we will load them up our side and give you the tools to fully control them. You can do this on your phone, tablet or a browser on Mac or PC.

*When instructed, please visit: [www.streem.com/clicker](http://www.streem.com/clicker)*

*There is a video version of this guide - to view it, [please click here](#).*

Once you are in, on the top right hand side of your screen, you will see a cog icon.

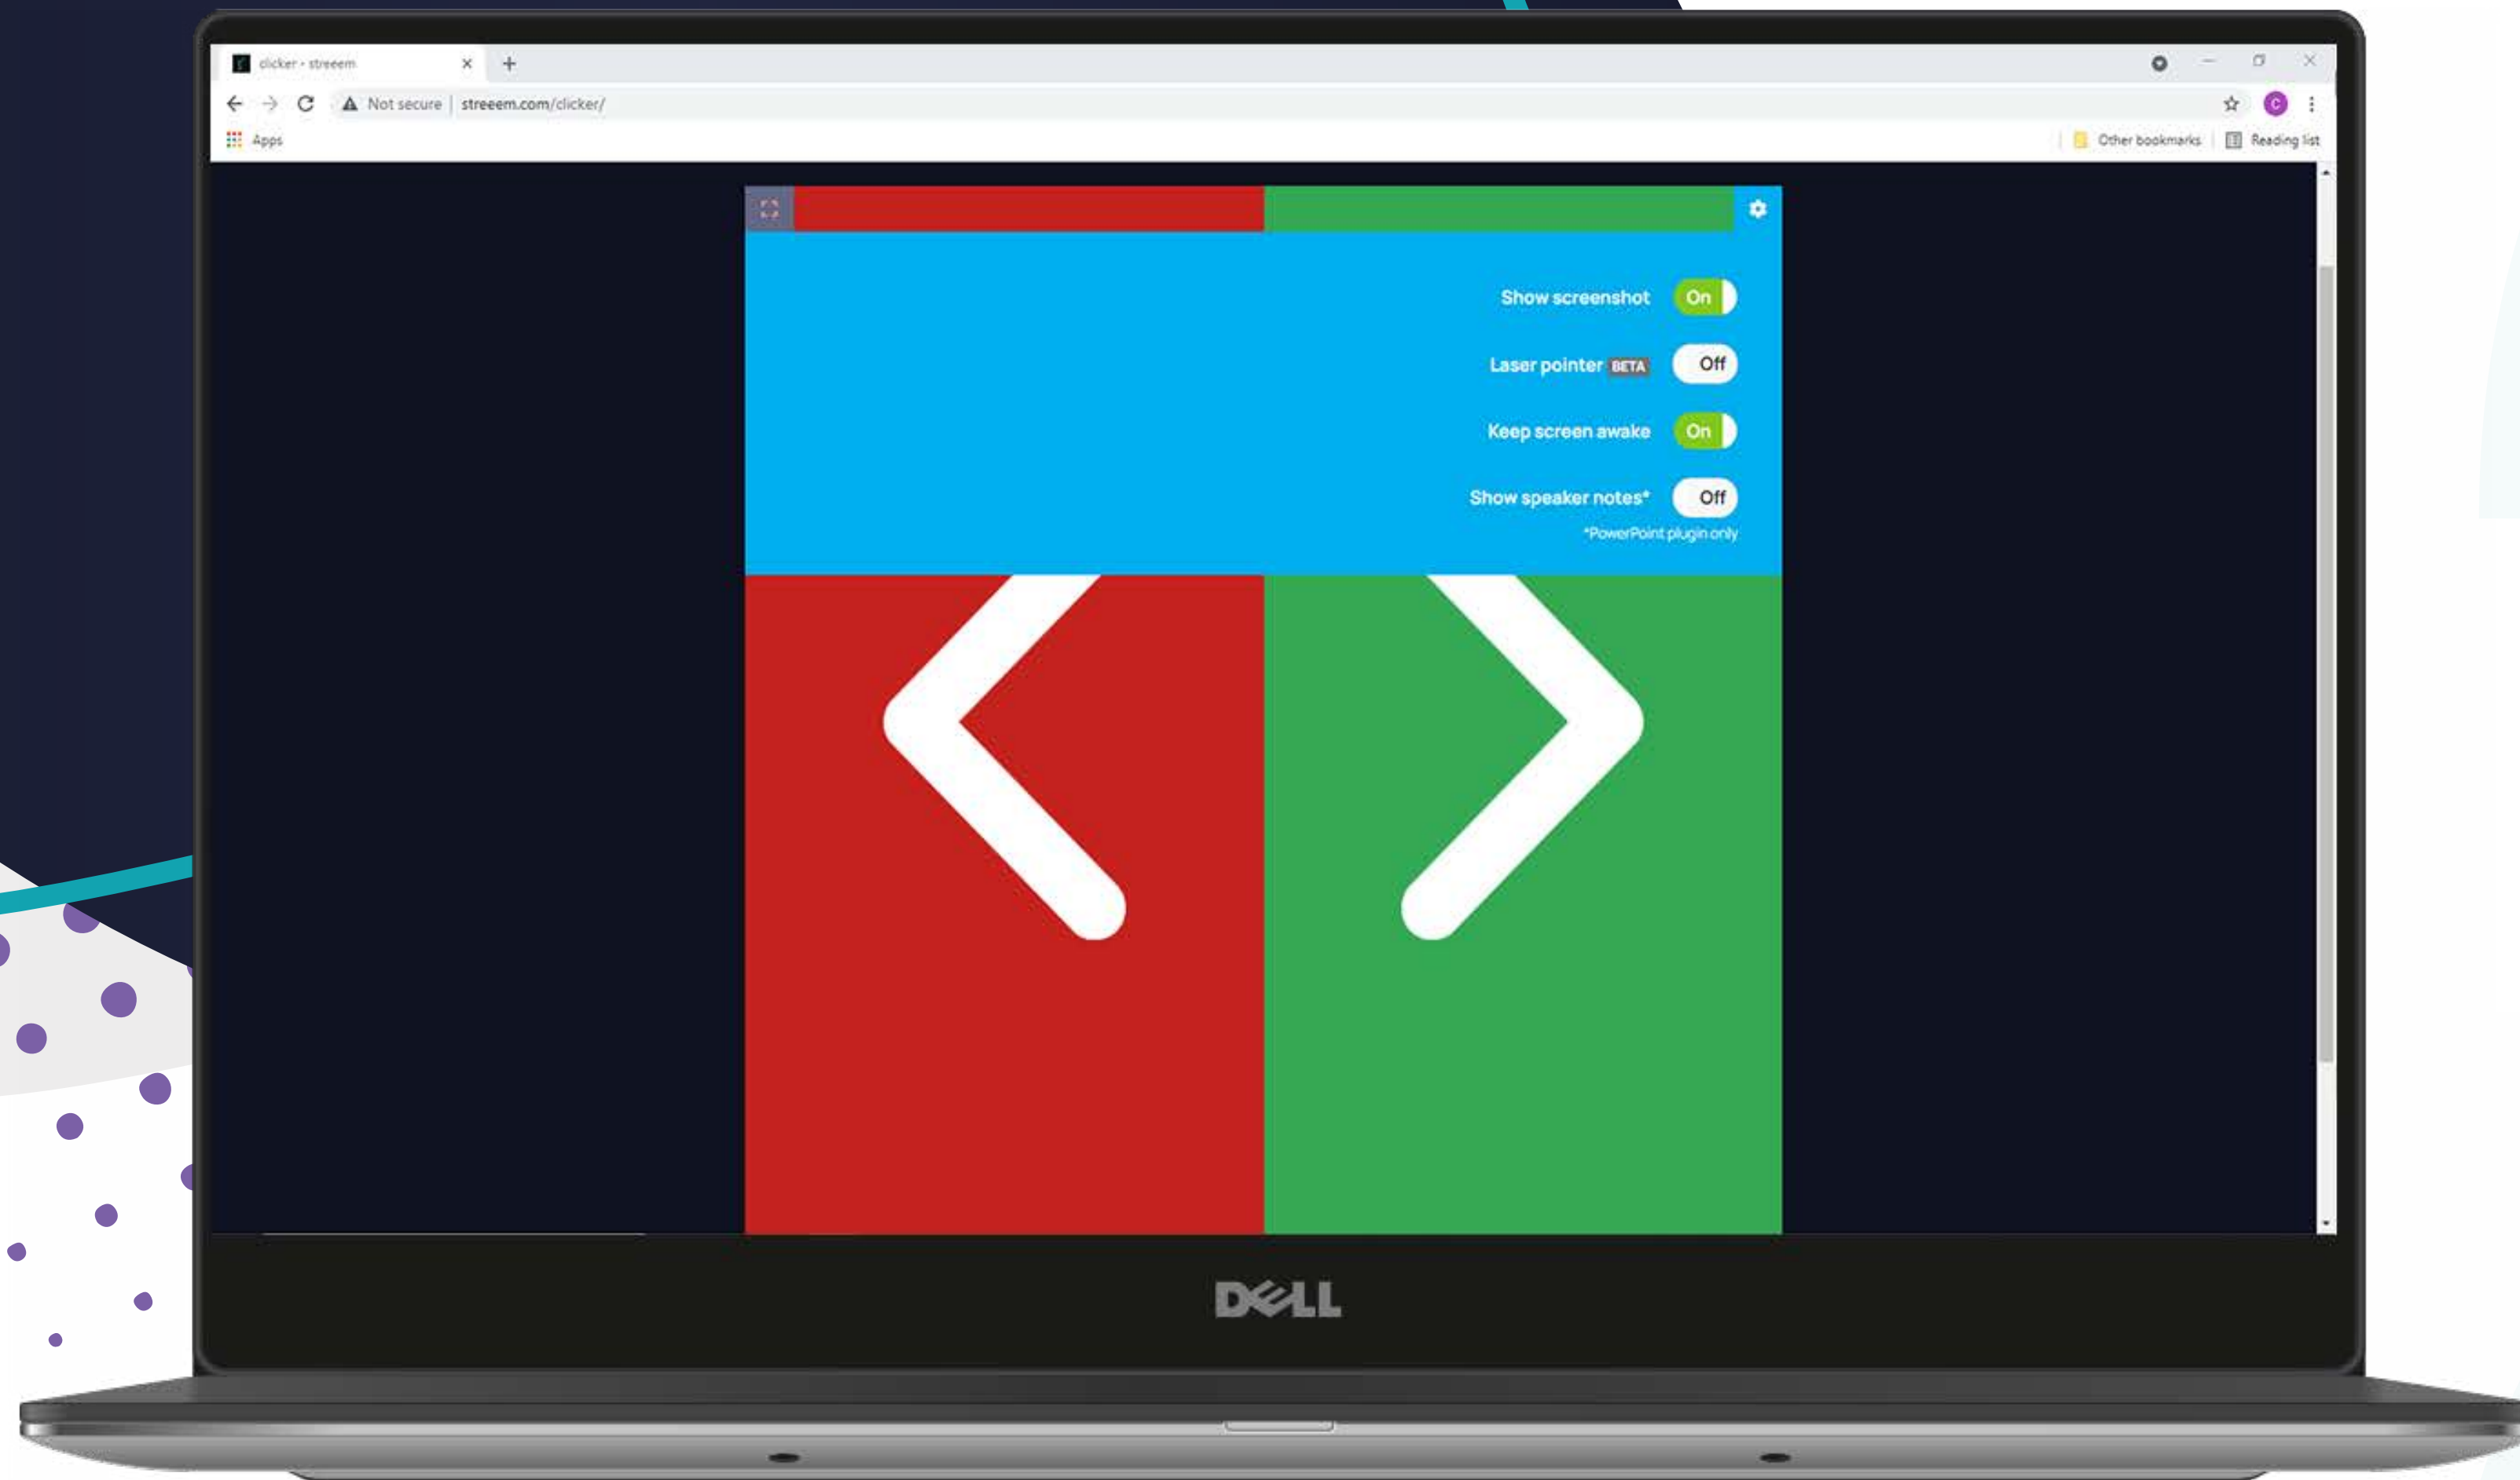

Click this and ensure you have enabled 'Keep Screen Awake' and, if your slides have notes, please also enable 'show speaker notes'. The notes function only works for some people on some devices so please refer to our separate document.

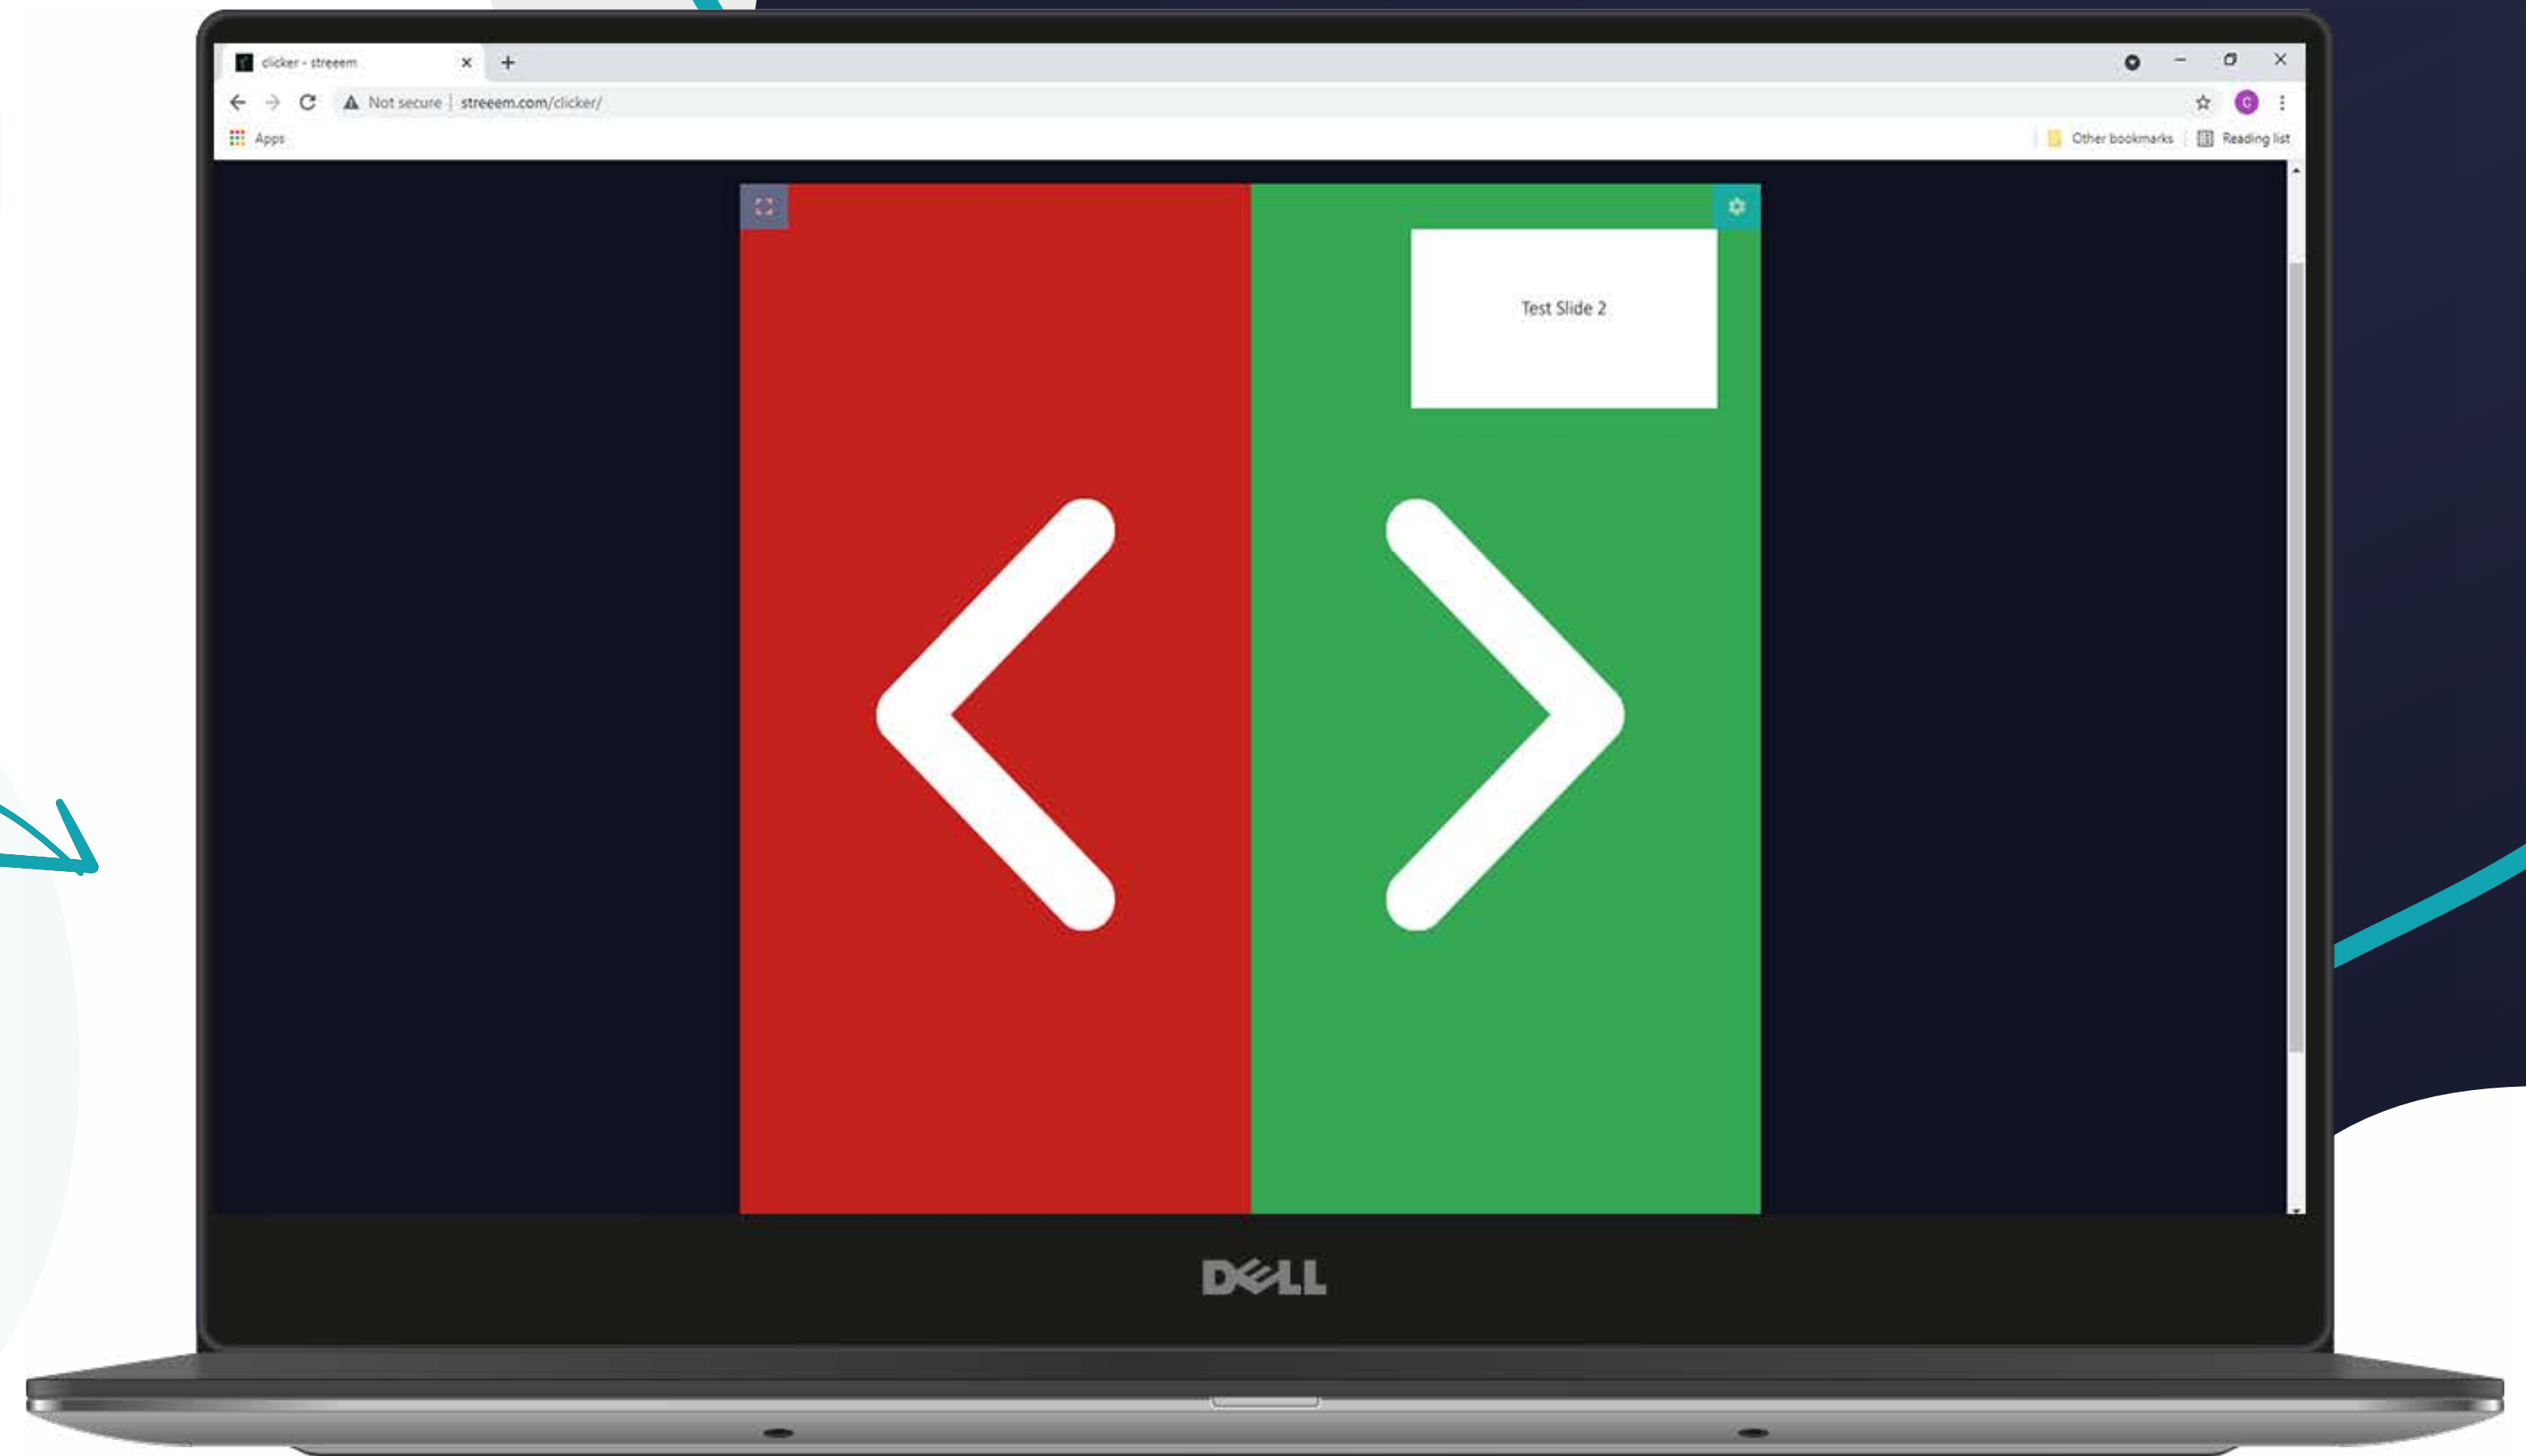

**At the top left of the clicker, you will have a full screen icon - this only works on pc/mac browsers.**

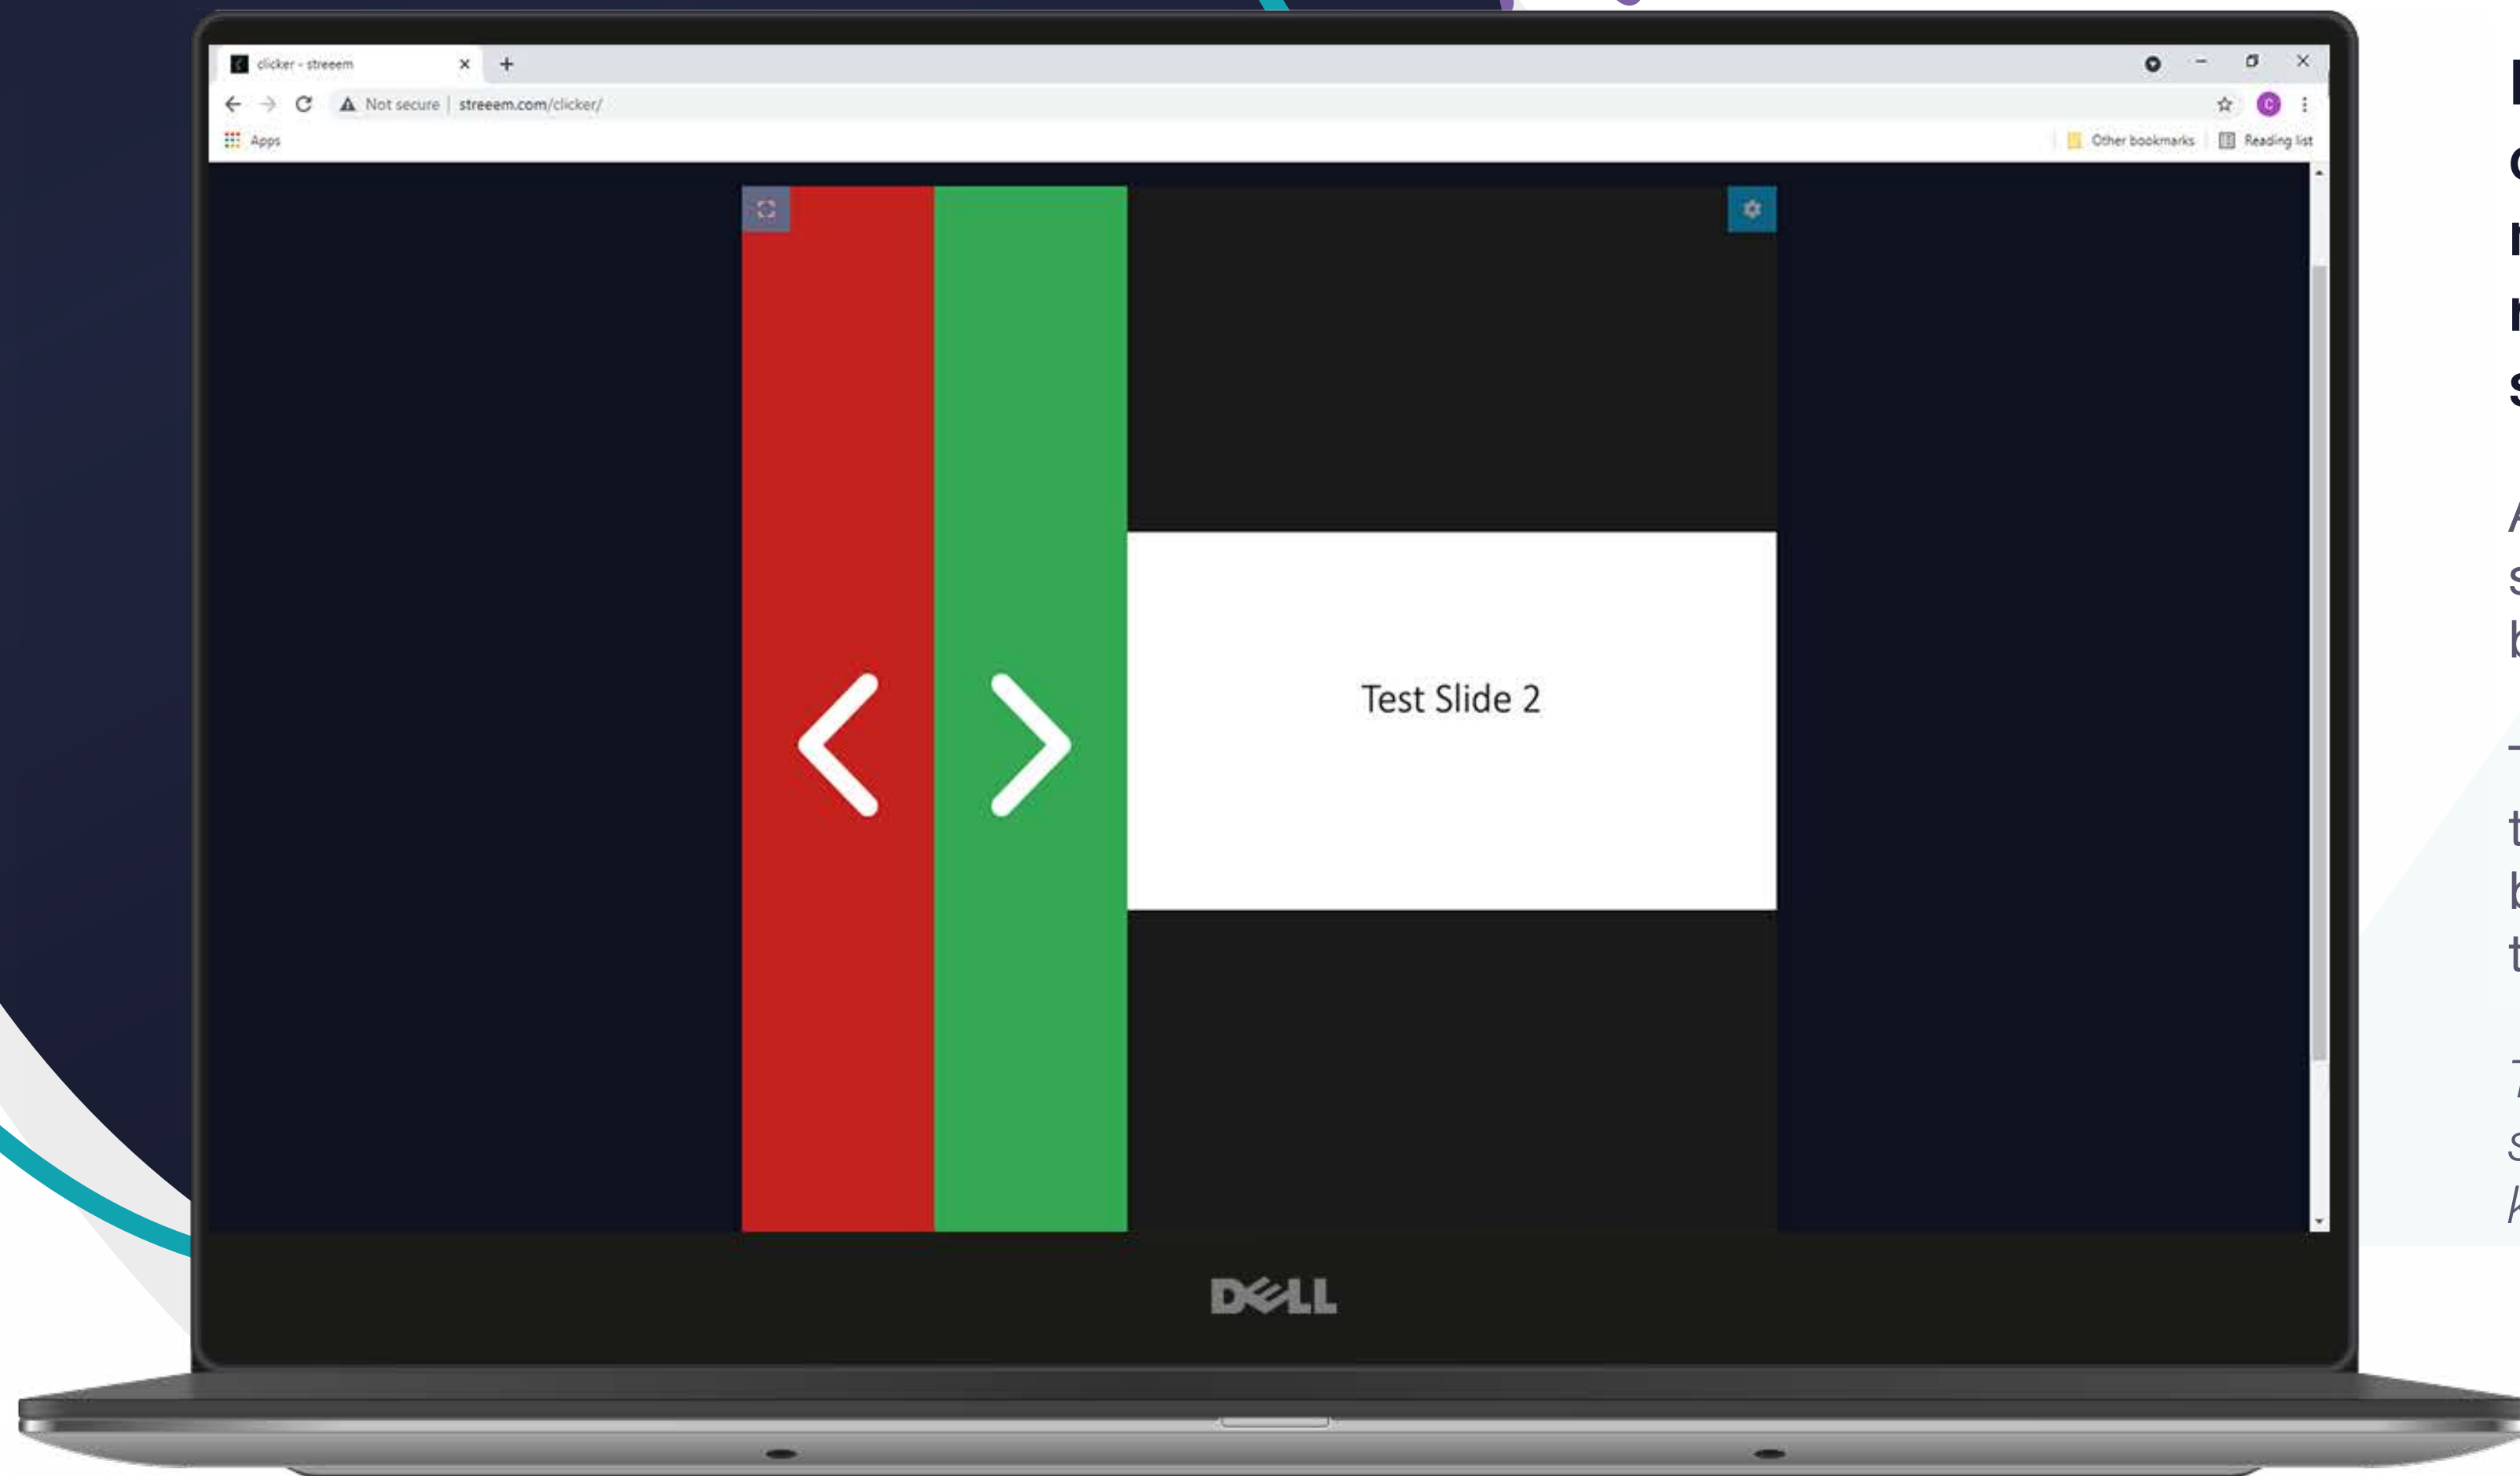

On your screen you will see a red left arrow, a green right arrow and, when we enable the slides, you will see your slide deck too.

On Mac and PC only, you can click on the presentation side deck to get different views and enlarge it.

Simply, to advance the slide or an animation on a slide, tap on the green arrow. To go back a step, tap on the red arrow.

If you adjust your screen view on mac or pc the arrows are replaced with more opaque versions on the left and right of the screen but operate in the same manner.

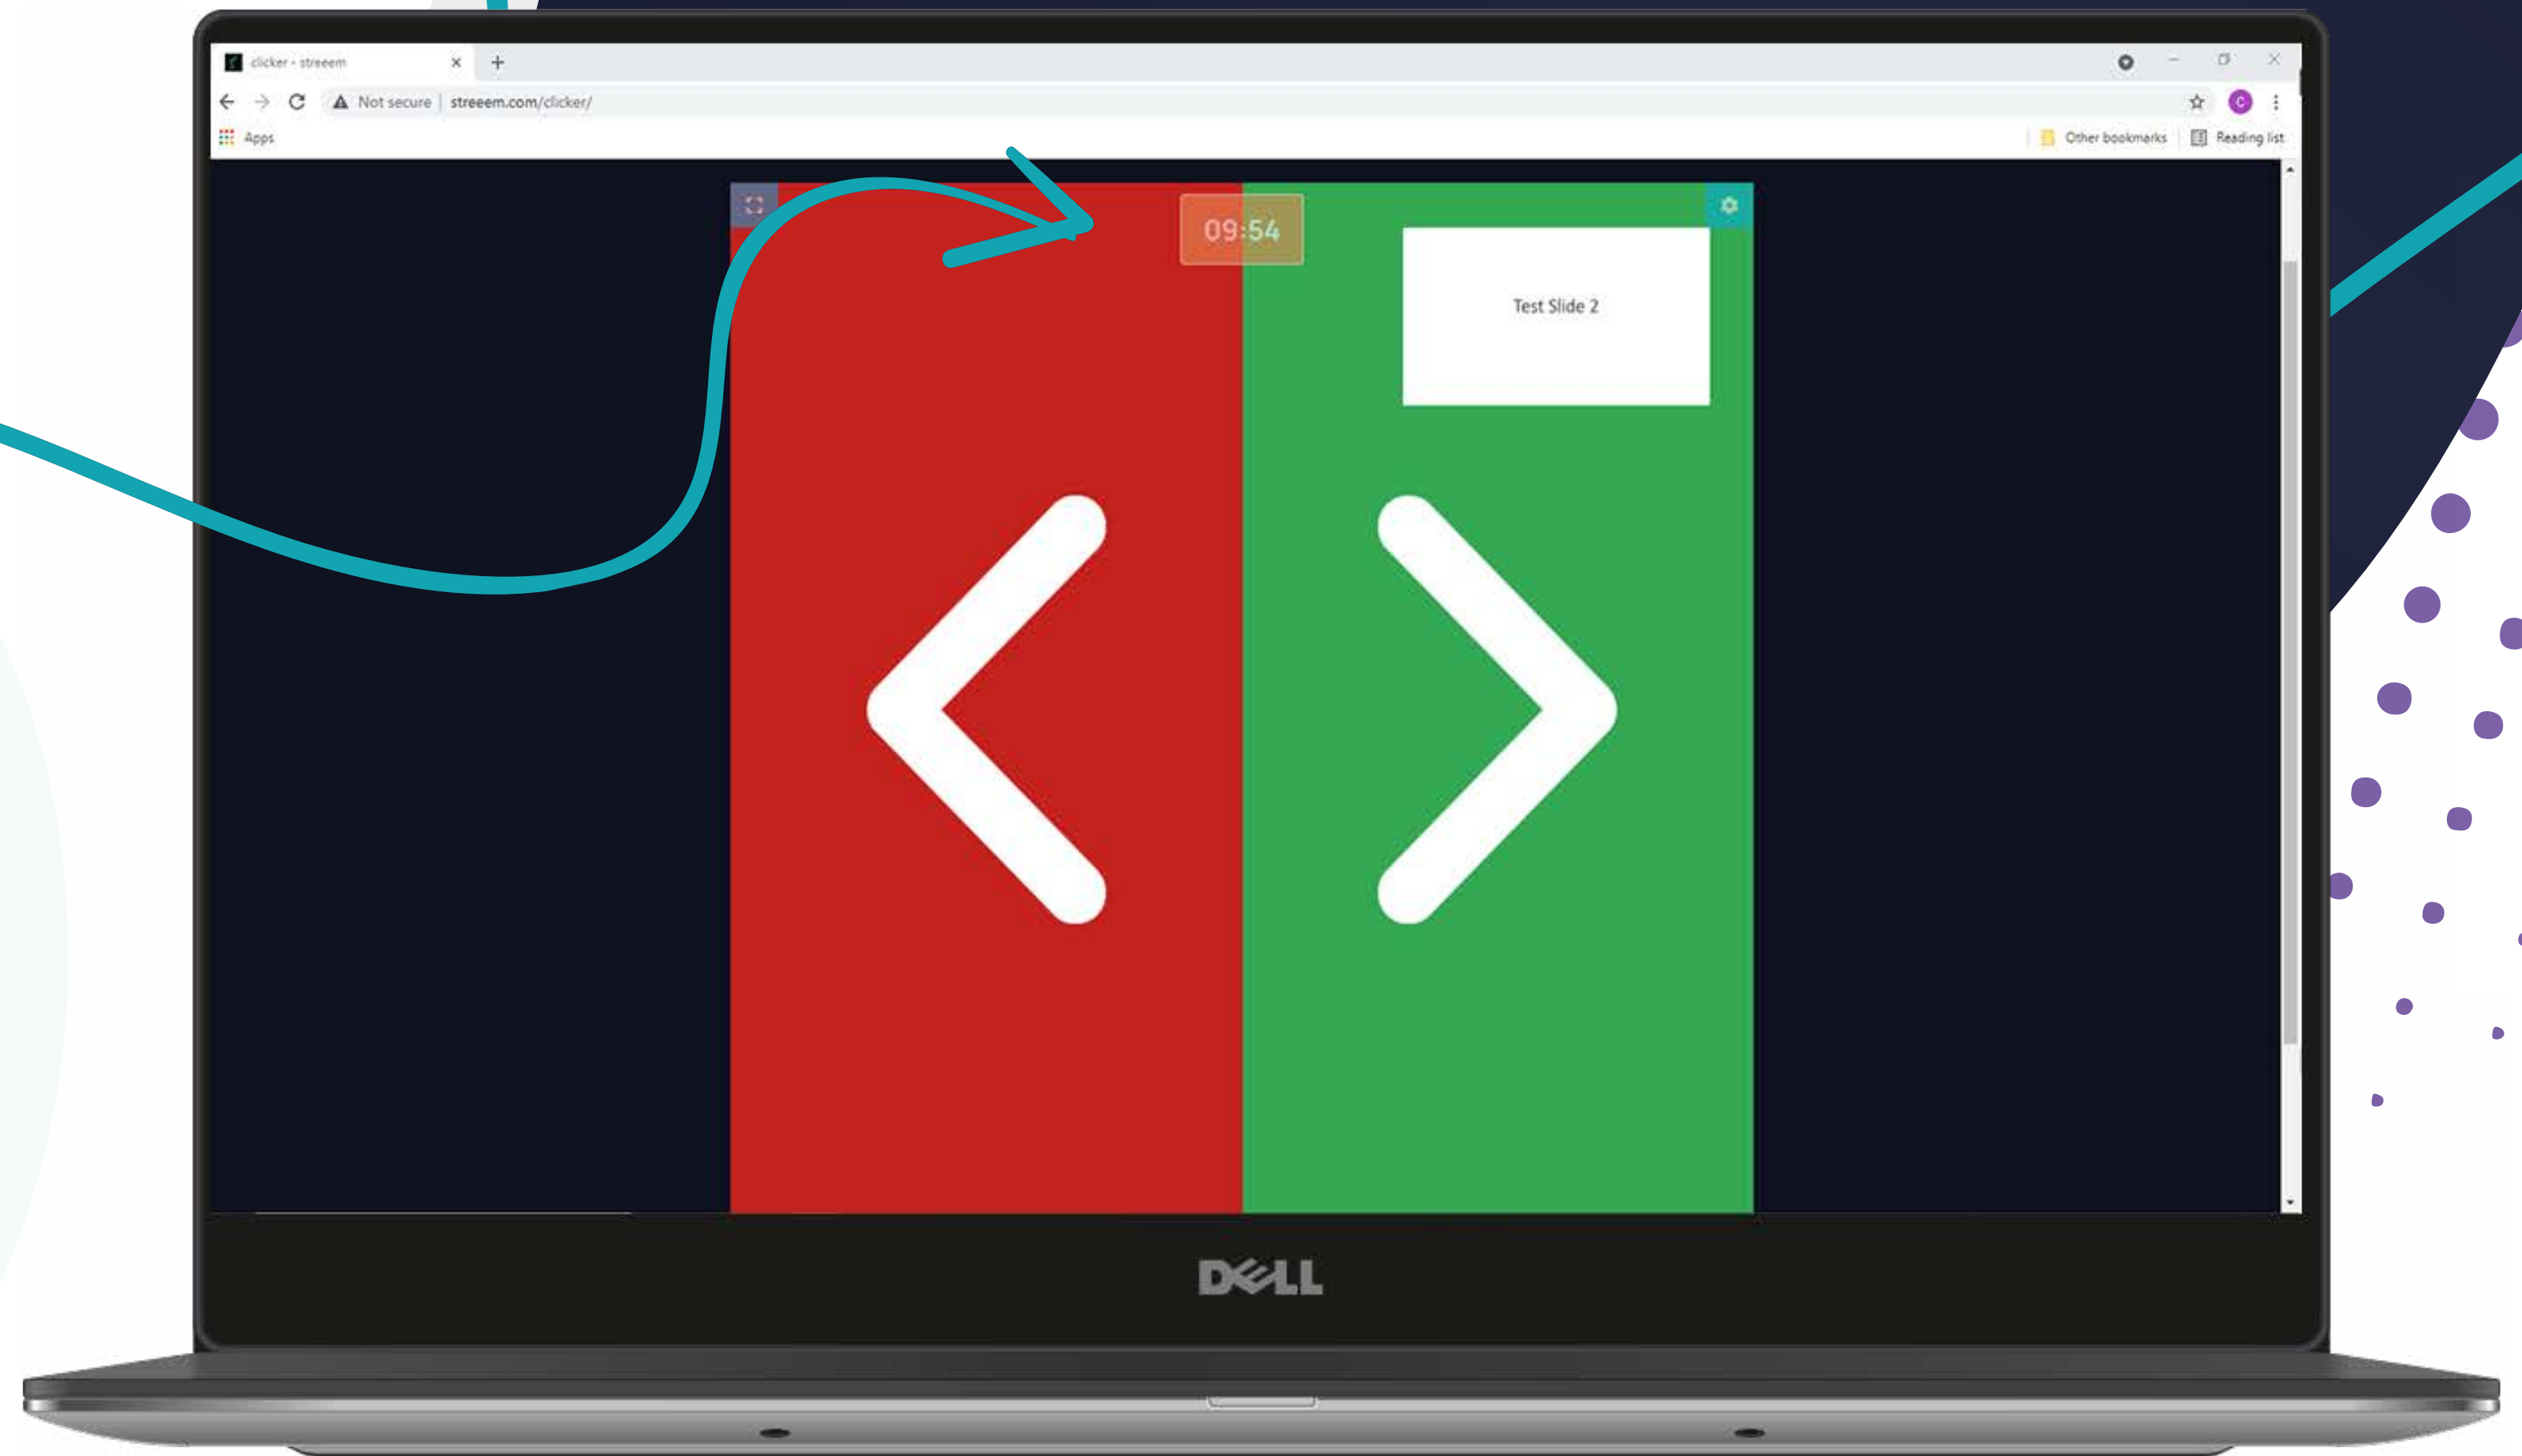

Also please note that the resolution of the slides you will see is lower than what is being broadcast, this is simply to save bandwidth.

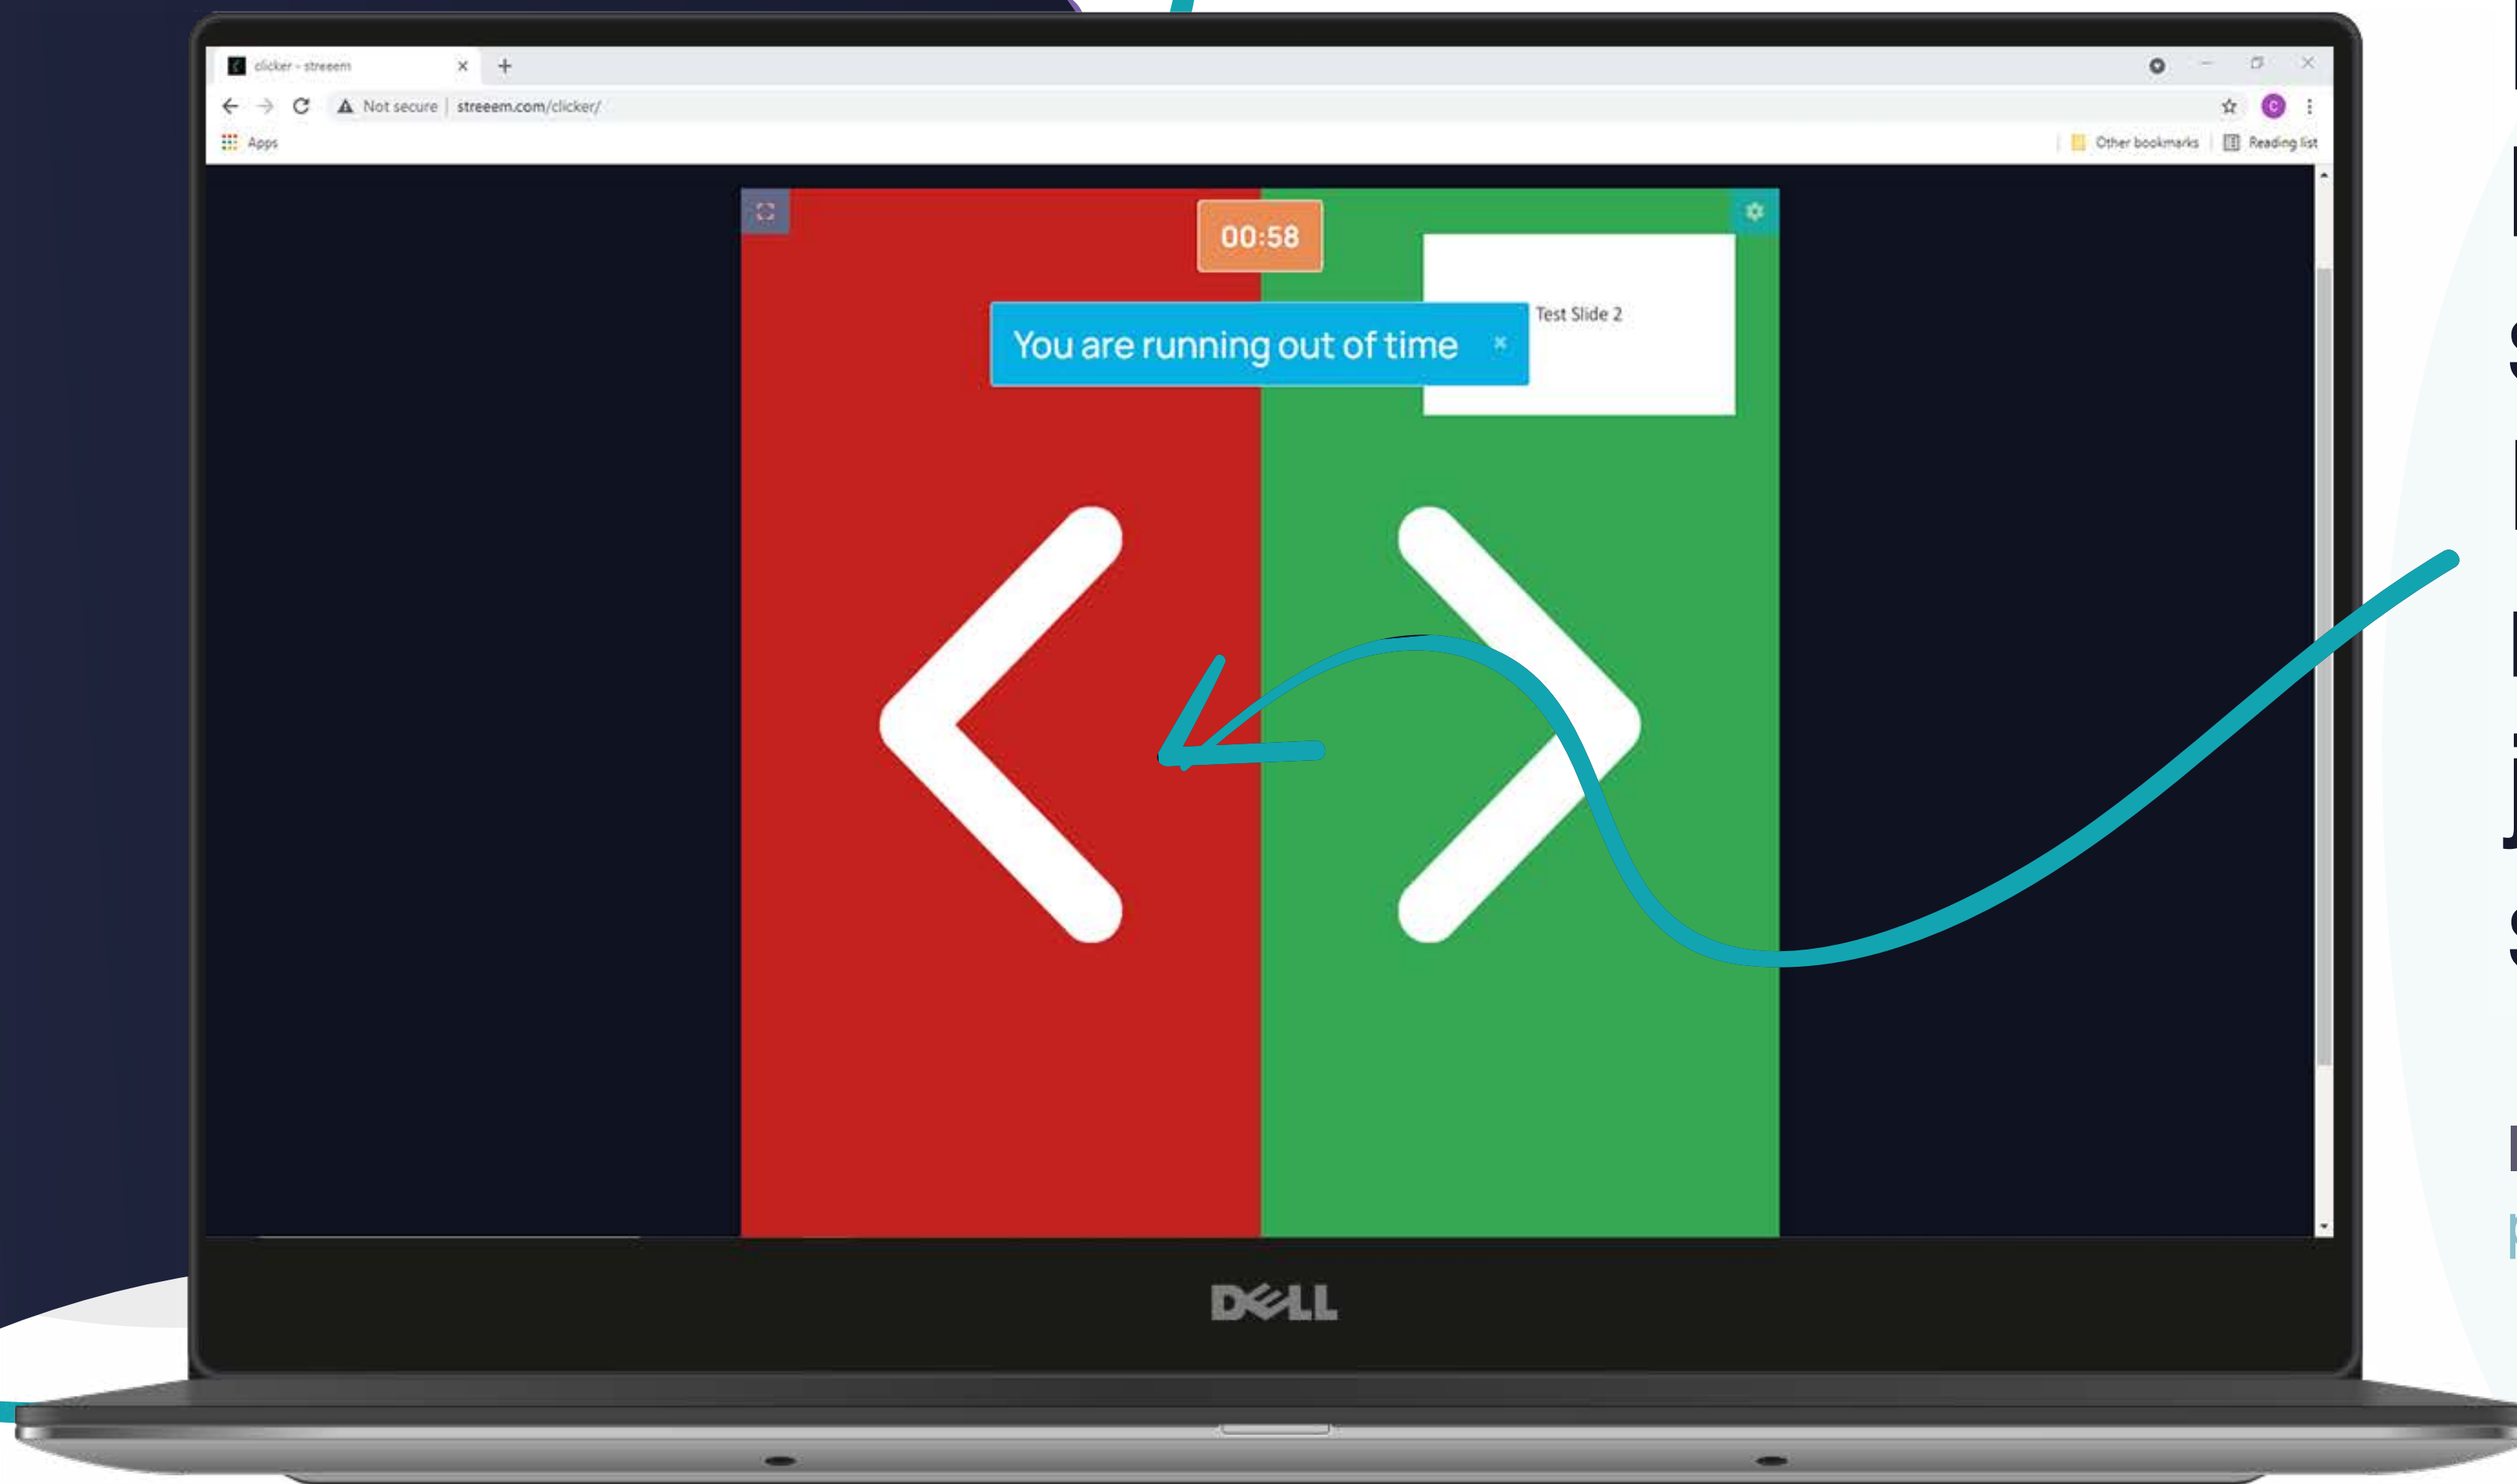

There is a very small delay between you tapping to advance the slides and seeing that this has been done - please don't press too many times too quickly!!!

*Throughout your presentation, you will be able to see a timer showing your time remaining – please keep an eye on this.*

**Throughout your presentation, you will be able to see a timer showing your time remaining – please keep an eye on this.**

*If we need to, we can message you – this will appear on the screen and you have to close it before you can continue using the clicker.*

**Finally, you will not be able to use the system in advance. Please wait until requested before joining your clicker session!**
